

A committee, consisting of Mayor C. B. Halpin and Councillors Jesse Fraser and D. C. Gourlay was appointed to locate a suitable site for the erection of such a rink.

## Government By Commission

It is not perhaps surprising that organizations and individuals are inclined to look askance at what has been termed the "rising tide of bureaucracy" as represented in the growing tendency to hand over the reins of governmental administration to appointed boards and commissions.

That there is a growing trend in this direction, both in the Federal and provincial arenas is Canada cannot be gainsaid. The evidence is palpable. One only has to look around and enumerate, for proof that a multiplicity of boards and commissions are at work performing, in some cases the functions of governments, and in others, the duties formerly delegated to the courts. And the tendency is towards increased growth of administration in this form.

Apart from the question of expediency, there are, of course, arguments advanced in support of administrative government by appointed commissions and boards and some of these arguments are not without foundation. For instance, it is urged with a good deal of truth that demands by the people upon their governments for extension of existing services and new services is increasing all the time, and that these services can be rendered with greater expedition and more efficiency by boards set up for the purpose than by governmental departments.

The argument cannot very well be refuted, but the question which the people have to face is whether or not they are willing to surrender a good many privileges, such as the principle of governmental responsibility to the electorate, the right of appeal against decisions and the right to know what is going on, for the sake of speed and perhaps greater efficiency.

That these privileges—or should one call them rights?—are impaired and threatened to an increasing degree with the multiplication of administrative boards and commissions was recognized at the recent convention of the Law Society of Saskatchewan, when delegates approved a committee report pointing out some of the principal objections to administration by commission and decided that the committee continue its work and further, supported a proposal that a program of education which would bring the facts and the problem to the attention of the public be conducted.

One of the chief objections to commission form of administration is the fact that arbitrary powers are usually vested in organizations which are not directly accountable to the voters. After this there is no appeal to the courts from the dictates and rulings of these bodies. In other words, the individual, deprived of recourse to the courts in which he has every confidence, has no power to obtain redress. That is to say, one of the fundamental rights of the individual is longer safeguarded to that extent.

Another objection, and this was stressed by the Law Society committee, is the fact that these appointed tribunals frequently conduct their hearings in secrecy, with press and public excluded, and coupled with this is the fact that reasons for decisions are not usually given. Under these circumstances, it is not surprising that the committee decided that "the comparative secrecy of the hearing tends to destroy confidence."

When rulings and decisions, binding upon the public, are given behind closed doors and without any accompanying reason therefor, it is to be expected that public confidence in tribunals that carry on their work in this manner will not be very strong.

On the other hand it may well be pointed out that frequently enough the wheels of justice operating through the established channels of the law courts travel slowly and, to the layman, it appears that the processes involved often entail unnecessary expense, possibly because of slow motion and the necessity of traversing a road bordered by a good deal of red tape.

No one in this country would wish to support the informality, sometimes bordering on indigity, which marks the administration of justice in some of the courts on the other side of the international boundary, but if measures can be adopted here which would simplify procedure and reduce its costliness without robbing the courts and legal processes of the dignity and respect in which they are properly held, they would be generally welcomed.

It is to the credit of the barriers attending the Saskatchewan convention that some recognition was given to this phase of the general question. The very fact that lawyers there recognize the advisability of modifying procedure and reducing expense to suit present day circumstances and conditions is encouraging.

### Relief Frauds

#### A Little Bit of Reason Is Necessary In All Things

There are still thousands of deserving people on relief. It would also look as if there are still some others who are imposing on the taxpayers. A case that apparently belongs in the latter category was revealed in police court. A Toronto resident was sentenced to seven days in jail and fined \$20 or seven days and had his driving permit cancelled on a reckless driving charge. An additional fine of \$10 or 10 days was imposed on him for failing to return to the scene of an accident in which another car had been damaged to the extent of \$36.

The evidence was that the accused had been drinking. His counsel stated that he is not working and is on relief.

What those who are paying the relief bills will want to know is how it is that a relief recipient has the money to own and drive a car, buy a driving permit and pay for gasoline and buy whiskey if he is really an indigent.—Toronto Telegram.

### Luck Ran In Threes

#### Guelph Couple Travel In Prize Car With First Money

Mr. and Mrs. Lyle O'Neill of Guelph, Ontario, went to the Maritimes in a new car on their honeymoon trip, all of which came about because luck evidently runs in threes for the groom.

A graduate of Ontario Agricultural College, O'Neill won a car in a contest. Just before the wedding day, he won a \$1,000 cheque in a honeymoon contest.

Then came a bit of hard luck when the new car was damaged when another car ran into it while it was parked on a Guelph street. This was nullified quickly, however, by a third bit of good luck when the insurance company gave O'Neill another new car to replace the damaged machine.

### Just A Lot Of Rubbish

There might be romance in June weddings but not for the sweepers in the Windsor Station concourse at Montreal. "Rubbish" is all it means to them, for one sweeper told a reporter approximately two cubic feet of confetti a day had been harvested this June.

Expert girls earn from \$40 to \$80 a week in one London factory where the best quality fur coats and scarves are made.

Astronomers have learned most of the important secrets of the sun at times when the sun was invisible during eclipse.

How fast can your car go? is the usual question. It ought to be how safe you drive.

Postmen of Britain are demanding tailor-made uniforms.

### FAMOUS STATESMAN DIES

Gaston Doumergue, one of France's most brilliant statesmen and former Prime Minister, who was also President of the Republic from 1924 to 1931, died suddenly from a heart attack while enjoying a rest at his home in the South of France.

### Small But Very Rich

#### Holland Has Third Largest Colonial Empire In World

The Netherlands comprise a mere 12,582 square miles of land, which is exactly 400,000 square miles less than Ontario alone, so that it is no bigger than some of our counties. The country, however, is crowded, having a population of over 8,000,000. But this small country has the third largest colonial empire in the world after Great Britain and France. The main colonies are the Dutch East Indies and Dutch Guiana, the total embracing 788,375 square miles and over 60,000,000 people. These include some of the most extensive raw and other materials which the world needs, notably rubber, tobacco, sugar, spices, coal, coffee, rice, tin, oil, and among other things 99 per cent. of the world's supply of quinine. More than one-fourth of all the materials go to the Netherlands. These colonies are administered as much for the benefit of the Netherlands as for the natives. From the Dutch East Indies alone the United States took \$45,000,000 of exports last year. Every country in the world is a customer for these necessities. There is a vast shipping trade, and about two-thirds are carried by Dutch and British ships in equal proportions.—St. Thomas Times-Journal.

### The Sparkle Of Gems

#### Scientist Cutting Splendid Beams And Forms A Pattern

The sparkle of diamonds, emeralds, and other gems was caught on a screen to explain to guests at a conversation held in London by the Royal Institution the science behind the fire of a jewel.

In a darkened room Professor Gordon directed a narrow beam of light on a succession of brilliant stones, and explained how by scientific cutting the beam was split up on reflection inside the stone, to form a pattern of many-colored stars on the screen.

Each stone colored the pattern according to its natural hue, but each of the outer stars of the pattern had the appearance of a rainbow in brief. The "spectrum," it was explained, a gem little used on account of its softness, had the unusual power of producing rainbows in pairs.

An emerald, cut in the traditional manner, gave a pattern of stars in the form of a cross in contrast with the random splendor of a "brilliant-cut" diamond.

### Some World's Fair Exhibits

#### New York Plans Something Different For Visitors In 1939

Visitors to the World's Fair of 1939 in New York may enter a huge model of the human eye, move levers to adjust the pupil and see the world as it appears to a cross-eyed person or as it appears to persons suffering from other eye disorders.

A "titanic replica" of the human skull is another attraction. "It is planned that visitors may walk about just over the teeth and then venture back toward the large aperture through which passes the breath on its way to the lungs and food as it goes stomachward," says an advance notice of the fair. The model of the human skeleton may be mechanically adjusted and made to raise its legs, close and open its hand and bend its arms while the "voice of the skeleton" explains what is taking place.

### Argentine Locust War

#### A Hundred Thousand Flame-Throwers To Be Used

Argentina is making ready to mass 100,000 flame-throwers against an enemy within her borders—locusts.

The National Board of Defence announced 100,000 flame-throwers will be used to attack the pests.

The Government would pay farmers who trap adult locusts with iron barriers the equivalent of three Canadian cents for 66 pounds.

The Government asked Congress for \$3,300,000 for the locust war.

The unseen forces that are contained in the sun's rays are necessary to all life existing on the earth.

Only about one in four of the 500,000 people who die annually in Great Britain leaves more than \$500.

### For Green Pastures

#### Much Attention Being Devoted The World Over To Grassland Problems

Although during the present generation, wheat has held the stage in the public eye as the most spectacular agricultural crop, there is a much older and important crop on which agriculture itself was founded in the dawn of civilization. This is the grassland or pasture crop. For many years, it was relegated into the background until agricultural science came to its aid by adding much to human knowledge (and profit to the farmer) in relation to grassland, its creation, management and fertilization.

Never before has there been so much interest all over the world in grassland problems, or so much attention devoted to research work along the lines of plant breeding to improve the different forage grasses and legumes, the nutritive value of the various forage crops in livestock feeding, the improvement of grassland in relation to soil fertility, pasture management, and the study of the best seed mixtures for hay and pasture purposes.

Recently scientists of the Dominion, Ontario, and Quebec Departments of Agriculture, together with those of the various agricultural colleges, held a two-day session of the Dominion-Provincial Pasture Conference at the Central Experimental Farm, Ottawa, where the main phases of cultivation and utilization of pasture lands were discussed, and this month representative agricultural scientists will assemble for the world's Fourth International Grassland Conference at the Welsh Plant Breeding Station at Aberystwyth, Wales, chosen because the work accomplished there is internationally known. It is expected much benefit to all countries will be derived from the discussions during the meetings.

Canada will be represented by Dr. L. E. Kirk, the Dominion Agronomist, who will deliver the plenary paper for the Dominion under the title of "The Valuation of Some Species of Grasses and Legumes for Pasture under Canadian Conditions." The only other Canadian representative, Dr. MacConkey of the Canadian Research Council, will give a paper "Nutritional Aspects of Forage Crop Production in Eastern Canada."

### Investigate Arctic Regions

#### Canadian, U.S. and British Scientists To Conduct Studies

Distinguished scientists from United States and Great Britain this summer will conduct investigations in the Northwest Arctic regions. Dr. Charles Cammell, commissioner of the Northwest Territories council, announced names of scientists and explorers granted licenses to conduct studies within the Territories.

Carnegie Museum, Pittsburgh, will be represented by Arthur C. Twomey and J. Kenneth Douth. Commander Donald B. MacMillan is heading the Bowdoin-MacMillan Arctic expedition. Charles E. Gilliam represents Iowa State College, Ames, Iowa, and the United States biological survey. Harry Snyder will be in the north sponsored by the National Museum of Canada and the American Museum of Natural History.

Dr. Crile will be from the Cleveland Museum of Natural History, Cleveland, Ohio.

The Royal Geographical Society of Great Britain is sending David Haig-Thomas, John Wright, Richard A. Hamilton, and is co-operating with St. John's College, Cambridge, in sending J. M. Wordie.

The Geographical Society has seven representatives who spent last winter in the north. They are T. H. Morgan, Patrick D. Bates, R. E. Fillingim, G. W. Rowley, R. J. O. Bray, P. Bennett and Robert Bentham.

The Canadian government is sending an unusually large number of surveyors and other classes of scientists into the north, most of them on the Naacopic. The east Arctic patrol, as this expedition is called, is commanded by Major D. L. McKeand.

### Want Lightweight Turkeys

Minnesota Extension Division reports that "a survey made by a group of national chain stores showed that about 73 per cent. of the buyers questioned wanted turkeys weighing between 8 and 13 pounds. Only about 5 per cent. of those questioned wanted turkeys weighing 15 pounds or more. Consumers like hens best, probably because they are smaller and more desirable than toms of the same weight. Marketing of half-turkeys was unpopular with both the consumer and the stores, for half-birds do not keep well, are hard to stuff and the consumer would rather see a whole bird, well cooked and browned, carried to the table."

### Money Found By Boys

Small boys playing "bank" with pound notes attracted the attention of Glasgow police. Investigation showed the boys had found the notes in a black tin box in an abandoned house. Headed £330 in English notes, there was an amount of German and Dutch money. The English notes bore the dates of the Great War years.

There are 8,190 miles of railways in the state of California.

Roofs of granite in seven colors are being laid in England.

Chewing Tobacco

### New Secret Of Longevity

#### Brigadier-General Says Wear Suspenders To Keep Fit

It is pleasing to find a variation in the prescriptions for good health at great age. Too much they have been limited to long walks, total abstinence, regular drinking and the like. Brigadier-General Samuel E. Tillman, who will be 90 in October, accomplished the ship news reporters the other day by attributing his fine physical condition to the fact that he has never supported his trousers with a belt. Suspenders are his secret, now revealed by a man who has gained distinction as soldier, astronomer, chemist and geologist.

There is much to say for the Tillman theory. Suspenders may be ugly, while belts are aesthetic, but the old galluses put the weight of the breeches on the shoulders and not on the hips. Put a belt on a man and he will automatically thrust his hands into his pockets, and his slumping. Give him suspenders and he can put his chest out and his tummy in without fear and social disaster. There is also the element of congestion of the abdominal capillaries under pressure of the belt. Suspenders went out when the vogue for country life made men try to be beautiful sans coat-and-waistcoat. They are coming back now and General Tillman's certificate will give them another fillip. If a man cannot have two cars in his garage he can express prosperity by having suspenders for each and every pair of trousers.—New York Sun.

### SELECTED RECIPES

#### RHUBARB PICKLE

1 qt. rhubarb, cut fine  
1 qt. onions, chopped  
1 pt. vinegar  
2 cups brown sugar  
2 cups Crown Brand Corn Syrup  
1 tablespoon salt  
1 teaspoon cinnamon  
½ teaspoon cloves  
1 teaspoon allspice  
¼ teaspoon cayenne pepper  
¼ teaspoon paprika  
¼ teaspoon Tabasco sauce  
Method: Cut rhubarb fine; put onion through food chopper. Combine all ingredients together and simmer gently until rhubarb is tender. Seal hot in sterile jars. Makes eight pints.

### Drouth Hits Mars

#### Astronomers See Signs Of Arid Conditions In Equatorial Area

The planet Mars is having a drouth worse than any in the midwest dust bowl and the African Sahara. The telescopic story of the drouth was reported to the American Association of Science by two Mt. Wilson astronomers, Dr. Walter S. Adams and Theodore Dunham, Jr.

This drouth was observed in the equatorial regions, the area where dark spots that astronomers suspect is vegetation, appear in summer.

It is the area fed by the canals of Mars. Judging by this report there is no doubt Martians use irrigation, if what astronomers see is vegetation.

### There Is A Difference

#### People Can Boo But Not Hoot At Soap Box Orators

You can boo soap box orators in streets of Willesden, Middlesex, England, but you can't hoot at them. What's the difference? A police inspector explains. "Hooting is loud in volume, draws the voice of the speaker, and can be heard by people living in the neighborhood for 100 yards." He added you could hear the orators' voices above boozing.

### Automobiles Increase

More than 3,000,000 miles have been added to the world's motor highways in the past eight years, the highways committee of the Automobile Manufacturers Association announced. Total mileage as of Jan. 1 was estimated as 9,900,000 miles. World motor vehicle registrations, the report said, total about 39,800,000, an increase of 2,350,000 in one year.

"The sun never sets on the British Empire," said the English woman proudly.

"How unfortunately," remarked the American girl. "At home we have such lovely sunsets."

### Better Commission Programs

#### Extension Of Programme Period Forecast In Announcement

Extension of the daily programme period to 12 and possibly to 16 hours in October when the new high power transmitters in Ontario, Quebec and British Columbia will go into action, and the formation of light opera companies in Montreal and Toronto, were some of the announcements made by Major Gladstone Murray, general manager of the Canadian Broadcasting Corporation, following a meeting of regional directors and programme directors.

Grand opera concerts under United States will be continued, the general manager said, but it was felt that Canadian light opera talent existed to a sufficient degree to warrant formation of two companies which will give a series of 26 concerts, 13 from Montreal and 13 from Toronto. Historical dramatizations and sketches based upon the activities of the Royal Canadian Mounted Police and other features representative of Canadian life, will be presented, with musical programmes originating in principal cities from coast to coast.

Of interest to western Canada was Major Murray's announcement that United States programmes will be brought in from Pacific coast stations to avoid the time inconvenience to western listeners when these broadcasts are "light in from eastern stations."

### Destruction Of Insects

#### Discretion Should Be Used Opinion Of Entomology Expert

Man, who to-day wages an undisciplined war against the insect, may very possibly reverse his tactics before this century expires. This prediction was made by Dr. Edith M. Patch of the University of Maine, president of the Entomological Society of America.

Dr. Patch reports that beekeepers throughout the country are strongly opposed to such modern methods of insect destruction as the use of aeroplanes for laying down of poison dust by the square mile which not only kills pests but also useful insects. Maybe some day, Dr. Patch suggested, we will have some sort of reservation where the useful insect can be studied and will be free from the danger of the poison spray.

Cable says an Italian doctor has perfected a machine to take the pulse by radio. Television is needed, however, before the physician can also examine your tongue.

A seaplane can rise from slightly rough water more easily than from a calm surface.

The English actor, Sir Henry Irving, was born on Feb. 6, 1858.

### Has World's Finest Service

#### Scotland Yard Able To Trace Fingerprints Within Five Minutes

Scotland Yard men will have the finest service of criminal records and fingerprints in the world when the extension to its building at Westminster is completed.

The Yard's "Who's Who in Crime" will incorporate the latest mechanized system of card-indexing finger prints. At present the Yard's library contains 5,000,000 prints, or more than 600,000 sets.

The appointment of Chief Inspector George Blackburn, of the West Riding police, as "adviser for the development of police records" is a link in a scheme to put the entire police records of the country at the disposal of any force when needed.

The present fingerprint classification system is so complete that the criminal record of a suspect can be produced within five minutes of the receipt of the prints. A similar system will be built up among provincial forces.

### Four-Year-Old Prodigy

#### Chinese Boy Living In Shanghai Has Read 641 Books

Four-year-old Den Ping-shen, Shanghai's "reading prodigy," who has read 641 Chinese books and memorized 93 of them, is now assured a university education.

Ping-shen, Peiping-born son of Mr. and Mrs. Den Shih-yuan, can read 6,000 Chinese characters. He was awarded a silver trophy, given a fund to complete his studies and named the "brightest boy in all the city." The lad was officially chosen "1937 Shanghai Boy" in examinations lasting four months, by which 84,000 boys were tested.

### Will Yield Wealth

Treatment of old floor and wall material from the dismantled refinery section of the Royal Canadian Mill in Ottawa by the Dominion Fuel Laboratories is expected to return hundreds, perhaps thousands of dollars, it was learned. Gold and silver particles lodged in the wall and floor material through past years will be recovered.

Most birds observe territorial boundaries, and each bird defends his nesting area against other birds which seek to intrude.

One way to keep your credit good is to pay your debts promptly.

### BLACKHEADS

Blackheads simply dissolve and disappear in this simple, safe and sure method. Get two ounces of peroxide powder from any drug store, sprinkle it on a hot, wet cloth, rub the face gently—every blackhead will be gone. Have a Hollywood complexion.

**Don't Let Foods Stale**

Foods that ordinarily stale quickly will stay fresh and tempting a surprisingly long time if you cover them with Para-Sani Heavy Waxed Paper.

Your grocer, druggist or stationer has Para-Sani in the handy, sanitary knife-edged carton. For those who prefer a lighter paper put up in sheet form ask for Appleford's "Centre Puff" Packs.

## Better Distribution Of Pure Seed Grain Needed To Assist Farmers

Although he recognized the value of purity in cereal seed, Hon. J. G. Taggart, minister of agriculture for Saskatchewan, reminded members of the Canadian Seed Growers' Association at their annual convention at Saskatoon, that there were "other factors to be considered in the production of wheat."

Raising the standard of the whole Canadian wheat crop was a laudable objective, but one could not expect that the majority of farmers could become seed growers overnight. It must be remembered that there were few farmers capable of becoming seed growers, the minister said, and he believed that this was a good thing. "The production of pure strains in wheat must be placed in competent hands," he asserted.

Because the great majority of farmers were not seed growers, it was to the interest of members of the C.S.G.A. to conduct work which would improve commercial wheat. Mr. Taggart declared. The policy of holding new varieties until they were absolutely pure and ready for registration, and of keeping the progeny of that registered seed also pure, would not add the commercial farmer materially.

"You must remember that the commercial farmer is the backbone of this country. If he fails, you, too, fail." The primary motive of the commercial farmer was to make money, and the seed growers could aid him in that respect by loosening restrictions placed on the distribution of good seed grain.

This objective, Mr. Taggart believed, could be attained through use of the seed exchange plan, which provided that farmers could receive registered or certified seed wheat, seed it and distribute the harvest, or part of it, to his neighbor farmer.

In his opinion, it was the only practical plan whereby the purity and standard of the commercial crop could be raised, he said.

Mr. Taggart suggested two factors which seed growers should bear in mind. (1) That seed growing should be confined to experts, and (2) that some intermediary steps, resulting in multiplication of the seed produced, must be devised to guard purity and to supply the commercial farmer.

I believe that in this manner the whole standard of the wheat produced in this country could be raised, at little cost," the minister of agriculture asserted.

Costly inspection of grain would also be necessary if the seed exchange plan was invoked. Inspection of grain could be carried out according to the commercial farmers' viewpoint.

### Good Polishing Agent

Vinegar Can Be Used In Great Variety Of Ways

Dull brass may be quickly cleaned by rubbing it with a piece of rag dipped in vinegar mixed with a little salt. Leave it for a few minutes then wash off with warm water. Dry well and polish.

To give light or dark paint a good gloss, use equal quantities of vinegar and paraffin. Apply this with a soft cloth and polish with a duster. Varnish may be cleaned with a ammonia leather dipped in vinegar and cold water.

To clean a vacuum flask that has not been used for some time, crush an egg shell finely and put it in the flask with some vinegar. Put in the cork, shake well and rinse with warm water.

Stains in flower vases or decanters may be removed by soaking them in warm water containing vinegar and salt. Shake them occasionally and rinse well in cold water. Dark woollens will keep their colors better if they are washed in warm soapy water containing a little vinegar.

### Easily Settled

The chief of the clan Macnab was at dinner in a Highland inn, where he expected to be asked to sit at the head of the table. The sign of another clan, however, was also one of the company, and insisted on taking the chair. When some of those present began excitedly to assert the superior right of one or the other, Macnab took another seat, remarking with cheerful pride: "Gentlemen, sit down where ye please. But wherever the Macnabs sit, that's the head of the table."

### No Time For Holidays

Although 73 years old, Dr. Frank M. Chapman, ornithologist of the American Museum of Natural History, has no time for vacations. "The greatest hardship you could give a naturalist would be to prevent him from pursuing his calling," he told an interviewer.

### An Interesting Product

Tar is one of the most interesting products of soft coal. From coal tar, nine crude products are obtained, and about 300 secondary products can be made from these nine. And from the 300, about 1,300 finished products are prepared.

Taxidermists usually use ants to eat away the flesh from tiny animals when the skeletons alone are wanted.

### Believes In Luck Charm

English Woman Sure Mummified Foot Brings Good Fortune

"Pharaoh's curse" is a lot of nonsense. It has never brought me anything but good luck."

Mrs. J. B. Bray, aged 63, Brixton, who made this statement, has for more than 30 years had in her possession what is believed to be the mummified foot of an Egyptian princess which came from a royal tomb in the Sahara Desert.

"The foot is a strange little thing; it is about six inches long, still in perfect condition, and shining like polished brass," Mrs. Bray said.

"It was given to my husband by a friend who took part in an excavating expedition in 1906, and ever since then it has been like a charm," she said. "It has brought me health and happiness."

"Before I had the foot I had been ill for 15 years. No doctor could say what was wrong with me."

"My husband and I decided that 'Pharaoh's curse' could not make me more ill than I already was, so I had the foot in my left hand and wished for health again."

"It was amazing. In less than a month I was perfectly well, and I have never been ill since. Now, at 63, I feel so well that I could knock the world over."

"Whenever I am in a difficulty I just hold the foot in my left hand and wish. Things are all right again in no time, and it works almost as well for my friends, though I allow only a few favorites to touch it."

"To give you an example. During the war we lived on the edge of Kensington Park. One night an air-raid started, and my husband and I sat in the drawing room feeling very frightened and praying for our safety. He told me to fetch the princess' foot, which I did, and held it in my hand throughout the raid."

"A bomb fell in the park. The windows of every house in the street were smashed. But our house remained absolutely untouched."

"When my husband died seven years ago, things began to go badly for me. I lost all my money and was nearly ruined. Then I took to carrying the foot about with me, and all at once I was in the lap of fortune again."

### Task Nearing Completion

Book Honoring War Dead Will Require Two More Years

The book of remembrance to commemorate by name those Canadians who died in the Great War will require nearly two years more before it is completed, according to defence headquarters officials at Ottawa. When finished the book will contain 66,990 names.

This includes 63,490 members of the Canadian expeditionary force who were killed, or died from war causes between April 8, 1914 and April 30, 1922. The latter date marks the final demobilization of the last member of the C.E.F. The other 3,500 names are of Canadians who died from war causes while serving with the British and allied forces.

All Canadians who have died, or who may subsequently die, from war causes since April 30, 1922, will be commemorated in a "Page Without Names."

### Canada Exports Soap

United Kingdom Was the Chief Purchaser Last Year

Canadian-made soap is evidently a popular seller in Britain. Last year the United Kingdom bought \$814,967 worth, being our chief soap purchaser.

Canada's domestic exports of soap during the fiscal year 1926-27 amounted in value to \$999,349 against \$1,152,439 the year before. The imports during the year were worth \$561,482, while last year the value was just over the half million dollar mark, coming mainly from the United States and the United Kingdom. This may be an unknown Canadian export industry but it is not an obscure one evidently—Brandon Sun.

### Represents Large Species

A prehistoric dragonfly, uncovered in Kansas, is believed to be a representative of the largest species of insects that ever inhabited the earth. It lived in the Permian Age, about 150,000,000 years ago, at a time when there were no birds or mammals in existence.

### Antelope For Cypress Hills

A herd of 25 antelope, presented to the Saskatchewan Government from the park at Watnort, Alberta, has recently been shipped into the province. These antelope are now making their home in the Cypress Hills Park.

### Indian Task Companies Lose Several Elephants Each Year Because of Cobra Bites.

On a bite on the tip of the trunk, or on the foot at the base of the toenail, proves fatal to an elephant in about three hours.

There are about 6,500 islands round the shores of Great Britain, including five hundred in the Hebrides group.

### Safest Place For Sailors

Latest Statistics Prove Ship Officers The Least Hazardous

Believe it or not, the safest place for a sailor is on board his ship. The dangers of the deep are minor risks compared with the hazards of the land. Jack ashore on leave runs into more trouble than Jack afloat. Latest statistics compiled by the medical authorities of the U.S. Navy prove all this.

It seems that sailors have a strong tendency to take spins on motor-cycles when on shore leave. With disastrous results, too, according to the official figures. In fact, motor-cycles have proved more fatal than the guns of enemy ships in several past wars—accounting for 30 per cent of the deaths in the United States Navy over a period years.

Equally unexpected at first thought is the statistically-established fact that 10 per cent of sailors meet death by drowning. More often than not these drownings occur when the sailors are ashore swimming at beaches. Swimming about their ships in deep water, few sailors are lost. But let them go "bathing" in relatively shallow beach waters, and accidents are frequent.

The rather fascinating figures in the medical report referred to also show that the number of accidents due to purely ship activities in Uncle Sam's fleet is exceedingly low, that deaths due to aviation and to the handling of high explosives are being reduced steadily, and that mortality due to disease is on the downward trend. But motorcycle and other motor vehicle fatalities continue to take heavy toll among American sailors on shore leave.

And so it would seem that our prayers for the men who go down to the sea in ships had better be offered up in behalf of sailors who go motor-cycling when the fleet is in port—Stratford Beacon Herald.

### Lake Dries Up

Severe Drought Conditions In Many Parts Of Western Provinces

Dramatic evidence of the transition of a section of Western Canada to an area of severe drought is contained in news despatches that Lake Johnston, famed for years as a nesting place for millions of waterfowl, and the largest body of water south of the main line of the C.P.R. in Saskatchewan, is now a mere puddle of water and will probably be entirely dry by the end of July.

Once a lake 25 miles long and 11 miles wide, covering about 275 sections in area, Lake Johnston is already so low that cars can be driven right through the lake from north to south.

With the disappearance of the big lake and its conversion into an alkali plain, farmers of the area south of Moose Jaw are facing an added handicap in the white alkali powder that is now being scattered through the countryside with every westwind.

Every lake in Alberta is shrinking annually, and some in the Southern and Eastern portions of the province are in danger of disappearing. Like Lake Johnston, but none have yet shrunk to the same alarming extent. The fate of the largest lake in Southern Saskatchewan emphasizes the need for rehabilitation and conservation of available water supplies in the drought area. Conservation of the annual runoff of water from the Southern Prairies is becoming absolutely essential if the district is to preserve ability to support any population, and work of providing dams and reservoirs to hold the natural water should proceed as rapidly as possible—Calgary Albertan.

### World Well Armed

If War Was Declared 48 Nations Are Prepared

From United States military authorities comes the calculation that at least 55,000,000 men could "spring to arms overnight" in 48 nations if a world war was declared. This "colossal figure" is given, we read, in a survey of the regular army, reserves and similar trained forces throughout the world. Without counting the 1,000,000 men in China, who are estimated to be trained in fighting, the survey shows that the world's regular armies, reserves and other trained men total 54,412,626—Halifax Herald.

### Had To Pay Fine

Although pleading coronation festivities would have been ruined for some people if they had not worked their women help longer than the prescribed hours, a confectionery firm at Hull, England, was fined \$500 for breach of the factory act.

### Just A Silly Question

An Aberdeen man went to Australia. When he returned three years later he found his three brothers, all with beards, at the railway station. "What's the big idea?" he asked. "Ye ken quite well ye took the razor awa' wi' ye," was the reply.

### A Valued Customer

Canada has a valued customer in Latvia, a Republic with two million inhabitants created in 1918 out of a bit of Russia on the Baltic. Last year the Letts spent more than \$400,000 here, mostly for copper.

The Mississippi river carries 400,000,000,000 tons of mud into the Gulf of Mexico every year.

### BITY, THE GIANT-KILLER

No one expected "Bity" Grant, diminutive United States lawn tennis star, to win his singles matches in the Davis Cup series against Australia, but he did just that. None of Uncle Sam's experts would predict that Bity will win the British singles title at Wimbledon, but Bity is a giant-killer and he "may" become the new titleholder.

### Likes His Mountain Home

Hitler Spends Most Of His Time In Bavarian Alps

If and when Premier Mussolini, flying across the Alps, visits Chancellor Hitler, he will be entertained in a mountain home that for beauty of setting and artistic content has few equals in Germany.

"Haus Wachenfeld," five miles above the upper Bavarian Spa of Berchtesgaden, now is much more the executive mansion than the Reich's Chancellery in the Berlin Wilhelmstrasse or the "house of the Reich's president" a few doors north. Hitler spends more of his time in his home on the "Berghof" than he does in Berlin. He loves the solitude of the mountains.

Hitler has enlarged the house considerably. The roof is heavy and slated. The verandah of the second storey has been converted into a series of loggias with wide arches resting on massive pillars. Heavy oak beams and exquisite panelling render the great hall on the main floor a thing of beauty. From his windows there is a fine view of the Bavarian Alps. A costly gobelin tapestry and carefully-selected paintings adorn its walls. A grand piano stands in a corner.

### A Lesson To Humanity

Taught By Bird Building Nest In Hindenburg Wreckage

In the blackened skeleton of the once majestic Hindenburg, a mother robin builds its nest. Flitting through the mass of charred debris it comes to rest on a blue egg, sheltered by a twisted girder. Above the scene of disaster, the suggestion of defeat, the merriment of love, a little new expression of unending life presently will wing forth to bear a song away. Thus a humble, cheerful, audacious bird brings a lesson to humanity. There is no wreckage whence a song may not arise—Christian Science Monitor.

### In A Different Setting

Reverend Crowsley Hunter took men of widely divergent views to a camp in Muskoka and after a few days' stay announced that they could live happily together. Maybe so. But wasn't the setting just a little unusual? When back in the ordinary turmoil of life with its competition, intrigue, ambition and struggle, the jungle instinct asserts itself once more and man again becomes the perfect beast—Farmer's Advocate.

### Years of Wear in Crocheted Lace

Simple stitches—an easy pattern—striking motif make a bedspread that is unusual in its rich beauty. Its durability makes it something to hand on from generation to generation. Inexpensive to crochet in natural or colored rayon. Use it to dress up your own bedroom or add a luxurious note to your guest room. You can make a lovely matching scarf, using finer cotton. In pattern 5869 you will find complete instructions for making the model shown; an illustration of it and all the stitches used; material requirements; a photograph of the model. To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

There is no Alice Brookes pattern book published

## Physician Gives Explanation Of The Causation Of Dreams And Their Interpretations

### Would Make A Difference

Slow Thinking Children Do Better In Group By Themselves

It is rapidly being forced on the attention of educators that school children must be separated into two classes. The backward children become more backward when thrown into the same classes with the bright ones, and of necessity the bright ones are held back by the others.

Child psychologists tell us that if we were thrown into a group of supermen, we would feel so inferior to them that we would not only become dumb in their presence, but would be permanently discouraged because of the contact.

If this be true of a mature person, how much more of a mature person, how much more of an impressionable child? The child is infinitely more sensitive than the grown person, and much more easily embarrassed and discouraged.

Many children considered incorrigible are not incorrigible at all, but simply discouraged with life and trying to wreak their vengeance on the grownups who seem to refuse to understand them.

The sooner it is discovered that a child is a bit slow, and the sooner he is taken out of the class with the rapid thinkers and placed in a group of children of his own mental speed, the better for all concerned.

We are learning that it is no disgrace to be slow in school. It is rare indeed that a cum laude student makes any large financial endowment on his alma mater. The money-making faculty and the ability to ascend the scholastic heights are rarely combined in the same man, and who shall say they are not equally useful in a rounded world.

Get your slow child into a class of his equals, and you will soon relieve him of his inferiority complex and enable him to live a normal and happy life—Kiwiana Magazine.

### Asked Patrons To Help

French Railway Improved Service By Acting On Suggestions

Practical and direct co-operation, between the French railways and France and the travelling public, has brought scores of helpful suggestions since Jan. 1, and the experiment of soliciting passengers' criticism, comment and counsel, already a success, was continued recently.

"Help us to run the railroad upon which you ride," was, in effect, the invitation addressed by the "Eti" railroad, which, as the name indicates, serves eastern France, and the response was prompt, voluminous, and frank. "Tell us what is right, yes!" said the rail officials, "but tell us also what is wrong," and the passengers did both—in candid fashion.

More than 400,000 pamphlets, inviting such suggestions have been distributed since the first of the year by the "Eti" railroad.

To procure the opinion of its passengers, the railroad also placed 950 suggestion boxes in its various stations, Paris, Metz, Nancy, Belfort, Chaumont, etc., and the daily return, so far, has never dropped below 50. Generally, it was near the 100 mark. What distinguished the suggestions was that, in the most part, they were constructive, and suggested practical means for improving the service.

### Idea Was Not Popular

New York Schoolboys Turn Down Idea For Cookery Lessons

A proposal to give boys some knowledge of home-making by Dr. Alberto C. Bonachi, member of the Board of Education, wasn't exactly relished by New York schoolboys. Some of them were horrified, but the general feeling was that they would not have time, or inclination, to help their wives because they would have to work.

When several schoolboys, between the ages of 11 and 15 years, were asked for their opinions of the proposed cookery course, one inquired: "Why should we study that sort of stuff? I'm gonna be a bachelor and live in an apartment hotel." His companion said he "expected to live on his life's money, so . . ."

Another young man, in favor of the idea, expressed the desire to enlarge his cooking repertoire. He said: "Right now all I know is how to boil a three-minute egg in one minute. How's that?"

We simply must get hold of that 50,000-word novel which hasn't a single "e" in it. We can hardly wait to read the hero "took her in his hand mbrace and said: 'Darst, will you be mine?'"

The first motion picture ever produced was "Miss Jerry," in October, 1894. Alexander Black was the author, scenario writer, director and cameraman.

Two kinds of trees, Sitka spruce and Alpine hemlock, make up 70 per cent of the timber growth of Alaska.

The fan attained the greatest popularity in the United States during the latter half of the 19th century.

A simple interpretation of dreams in a physiological sense that would rule out "much of the significance attached to dream interpretations by some psycho-analysis" was given to the paediatrics section of the Canadian and Ontario Medical Association's convention.

Dr. Howard Spohn, discussing the physiology on the central nervous system in regard to paediatrics, described sleep as a state of interruptions of connections between the brain and the organs. In sleep, he said, isolated processes occur and produce dreams which are indefinitely related at times to waking conditions.

For example, he said, in European countries where famine has been prevalent at times, dreams of various foods have been frequent. Sleeping persons suffering from thirst frequently dream of water.

Intense thought produced by concentration may persist through sleep, he said, perhaps leading to the idea of sleeping over a problem.

In his view, he declared, it was better to use dream interpretations in a physiological than a psychological sense and such a simple interpretation should "alleviate some of the fears and dreams of the functionally nervous patient."

Dr. Spohn described how "conditions reflexes" are induced or acquired. The mere sight of a rose, even after an artificial one, gives some persons hay fever, he said, indicating they had been conditioned to react to the presence of a rose by experiencing hay fever.

He gave other examples: The individual who becomes faint and hysterical at the sight of a snake after being frightened by conditions by his first encounter with such a reptile; the uncontrolled attacks which appear with sudden noises in shell-shocked individuals conditions in the war.

Many mental derangements and behavior problems were often results of improperly treated conditioned reflexes, he said.

"By means of the unconditioned reflex the individual is connected with the outer world by innumerable living threads," he continued. "How important these threads are to the mind and in the mentally ill these reflexes should be of the proper character, and how tremendously important are the first educational conditions reflexes used in treatment; and how fraught with possibilities are the mistakes where every change in the external media, even seemingly insignificant ones, is reflected on a highly sensitive nervous receptor in the brain."

"Great care must be exercised in creating a suitable atmosphere for educational work in hysterical children and in re-conditioning the problem child," he continued.

"Speaking generally, it is appalling to note the lack of interest in proper reflex conditioning which goes on in hospitals and institutions for the treatment of functional nervous disorders." He complained mainly that hospitals were noisy.

### The Way To Do It

Follow This Advice And Keep Out Of Trouble

The way to have teeth with which you can crack nuts is to refrain from cracking nuts with your teeth.

The way to have a stomach in which you can put practically any kind of food is to refrain from putting practically any kind of food into your stomach.

The way to have eyes with which you can read fine print in a poor light is to refrain from reading fine print in a poor light.

The way to have friends who would give you the shirt off their respective backs is to refrain from asking them for their shirts.

The way to make friends with a traffic cop so that he will overlook slight infractions of the traffic rules is to avoid slight infractions of the traffic rules.—The Transmitter.

### In Great Demand

New York Dealer Of Dress Suits Reports Business Good

People are cultured nowadays, says a veteran renter of dress suits in New York.

"Clerks, stenographers, even newspaper men to-day get married or go to parties in Italy," the renter said. "Would you believe it, lately a lot of nice looking fellows came into my shop to rent dress suits for a wedding. Two days later the suits came back in fine shape. Not a spot on 'em! Who were they but a bunch of longshoremen who'd been to another longshoreman's wedding?"

"People got culture nowadays," he concluded.

### What Price Greendler

Frederick III. of Prussia once killed a 66-point stag and prized the antlers highly. Later, they came into the possession of Frederick William, who traded them to the King of Saxony for a regiment of six-foot grenadiers.

Large government expenditures continue to increase industrial activity in Mexico.

## Fairview

There will be an anniversary service at the Fairview church, Sunday August 15, at 3:00 p.m. Rev. R. B. Layton of Lacombe will be the special speaker. Picnic lunch on the church lawn will follow the service.

Binders are in the fields cutting barley these days.

A nail driven into a tree four or five feet above the ground will remain at that height however tall the tree grows.

## Radical Legislation Enacted in Provincial House

(Continued From Page One)

equity unless he has first obtained a license as a banker to carry on his business as such.

It is described by the critics of the legislation as "the most un-British act ever passed by a legislature."

Bill No. 6, however, is the one that has stirred up the most bitter opposition. It is the act to provide for the regulation of the motorization of the credit of Alberta. This act provides for licenses of \$100 for each bank branch in the province of which there are 207, as well as licenses for all bank employees.

It contains penalties for bankers or their employees who in any way attempt to hinder or prevent the operation of Alberta Credit and the penalty may be the suspension of the license and payment of the penalty fee if the license is renewed of as much as 1000 times the amount of the original license fee of \$100. If this is added up and the banks—all of them—offended against this act and had their licenses rescinded and were fined the maximum penalty to have all the licenses renewed it would mean that the bankers would have to pay \$20,700,000.

Provides for Directors

It provides for the appointment of directors by both the licensed banks and the Social Credit Board to control the financial policy of the banks and opposition members and legal advisers alike are almost unanimous that this feature will wreck the legislation, as the control of banking is clearly stipulated in the B.N.A. act as the right of the dominion and not the province.

The last act to be named is the bill No. 9, which is the briefest one in the lot and simply provides that no action calling into question the validity of the acts passed can be begun, maintained or continued in the courts without the consent of the lieutenant-governor in council.

Perhaps the most dramatic incident in the session came when Hon. J. W. Huggill was questioned by D. M. Duggan, Conservative leader, as to the legality of the acts and Mr. Huggill stated that the proper time came he would advise the lieutenant-governor without fear of the consequences. He had already admitted that the bills were unconstitutional. For this Premier Aberhart the next day asked him to resign.

## Spruceville

SPRUCVILLE—Mr. and Mrs. Heath and family are spending a week in the mountains.

Mr. and Mrs. Hutchinson are receiving congratulations on the birth of a daughter.

Mr. and Mrs. O. S. Young and Mr. and Mrs. B. J. and families spent Sunday with the Barnes.

Geo. Orme of Red Deer is spending a couple of weeks with Elmer and Ross Young.

Mrs. Heath, Sr., is visiting with Mrs. Jones of Lacombe for a few days.

Mrs. Art Benson of Hanna is holidaying with her parents.

Mr. L. D. Wright of Olds is staying at the Barker home and renewing old acquaintances.

Friends are pleased to learn that Southward's brother of Grande Prairie is much improved and Mr. Southward is expected to return home again this week.

The Juniors are holding their regular meeting this week at the home of Mrs. Barnes.

Alla Deil called on Mr. and Mrs. Bob McGeachy on Sunday, and other acquaintances in the district.

## George Arliss in Thrilling Picture At Avalon Theatre

Against a background of the rich and exotic Orient, George Arliss stars in his latest release, "East Meets West" as the feature picture of a double bill showing at the Avalon Theatre this Thursday, Friday and Saturday. It is a fast paced melodramatic story of eastern intrigue and western diplomacy. Arliss, supreme master in the subtleties of witty conversation and verbal fencing, is given the role of a powerful rajah, whose strength lies not so much in the fabulous wealth of his kingdom as it does in the craftiness with which he handles his financial affairs.

The second show stars George O'Brien in "Park Avenue Logger" an adventurous and thrilling story of a "tough" dude.

## Spinners Ask Parliament For Pensions At 55

LONDON, Eng.—The signatures of a million British spinners seeking pensions at the age of 55, were carried into the House of Commons today in sacks, wooden tea chests and brown paper parcels.

In a preliminary demonstration last night, London spinners marched with banners to Westminster to greet Miss Florence White, leader of their movement, when she arrived with a petition. She had brought it 190 miles from Bradford in the north of England in a gaily decorated truck.

Under the tolerant eye of police, they cheered and sang "For She's a Jolly Good Spinner" as Miss White waved a banner from the top of a truck. The spinners—many of whom are "war spinners"—complained that they have to go on working until they are 65 before they get a pension while a widow may get her pension earlier.

Government critics of the proposal declare that the plan would be the first step toward granting all women of the insured class pensions at 55, which would add \$80,000,000 a year to Britain's expenditures.

Canada's exports to Greece in 1936 consisted almost entirely of wheat, that commodity representing \$6,088,412 out of the total Canadian exports valued at \$6,985,300.

## Clive

CLIVE—Mr. and Mrs. M. H. Dills and son, Gilbert, motored to Cranbrook, B.C., Monday to visit their son, who is a student there.

Miss Hilda Peterson and Mrs. Belle Longstreet of Seattle, Wash., arrived Saturday to visit with friends and relatives in the Clive and Erskine districts.

The Walters-Reynolds-Alison picnic was held Sunday at the home of J. L. Walters instead of being held at the Red Deer River bridge south of Joffre.

Several other farmers here have started cutting wheat.

Rollie Dills has taken over the Massey-Harris agency from T. A. Brereton who has been handling it for some years.

Will Speak at Clive

Rev. H. D. Leitch of Wetaskiwin, President of the Alberta Conference of the United Church, will be the guest speaker on the Clive circuit for Sunday, August 15th. Mr. Leitch will preach at Spring Valley at 11 a.m., at Jones Valley at 3 p.m., and at Clive at 8 p.m.

## Lincoln

LINCOLN.—The August meeting of the L.C.C. was held at the home of Mrs. Unwin, when plans were made for the annual chicken supper which is to be held on October 8. The September meeting will be held at the home of Mrs. H. Dool.

We are sorry to hear that Miss Dorothy Schilling is in Lacombe hospital, and wish her a speedy recovery.

Mrs. Thompson has been visiting with Mr. and Mrs. Herb. Dool.

Mrs. W. Drege and children and Miss Daisy Heath of Canmore, spent last week with their sister, Mrs. J. Spink.

Mr. and Mrs. Gordon Gilbert were week-end visitors with Mr. and Mrs. A. Saunders.

Mr. and Mrs. Milburn of Leo, have been visiting with their daughter Mrs. H. Kamiah.

A very good ball tournament, was sponsored by the Lincoln ball team on Sunday last. Iowalla won from Spruceville in the first game, and Lincoln won from Lacombe Woodmen in the second. Lincoln beat Iowalla in the final game, after playing an extra inning. A very large crowd was in attendance and Lacombe and District band supplied music for the afternoon.

## CHRISTIAN SCIENCE

At all Christian Science churches

next Sunday, the subject of the Lesson-Sermon will be "Soul."

The following is one of the Scriptural quotations contained in the Lesson-Sermon: "One thing I have desired of the Lord, that will I seek after; that I may dwell in the house of the Lord all the days of my life, to behold the beauty of the Lord, and to enquire in his temple" (Psalms 27:4).

One of the correlative passages from "Science and Health with Key to the Scriptures," by Mary Baker Eddy, is as follows (page 248): "Immortal Mind feeds the body with supernal freshness and fairness, supplying it with beautiful images of thought and destroying the weeds of sense which each day brings to a nearer tomb."

## NOX KIDNEY FLUSHERS

Removes That Backache

To neglect the first symptom of

Kidney trouble might lead to very serious results. Your kidneys contain thousands of little filters, each one having special work to perform.

If some of these filters become clogged, poisons and Uric acid enters the blood stream. The result is a backache, a dead, heavy pain. The Uric acid deposits a fine granule in the joints, causing a pain known as rheumatism. Nox Kidney Flushers really flush the kidneys, placing them in a healthy, sound condition. No more getting up at night—no more backache. That sallow complexion is replaced by a natural clear skin. Your eyes become bright and your headaches disappear. Each package of Nox Kidney Flushers contains a full month's treatment. There is only one Nox Kidney Flusher—they improve your entire general health. Your Kidneys and Liver will function perfectly. Why not start today on the road to good health, let Nox Kidney Flushers bring you good health.

## Governments Requested To Buy Certified Seed

(Continued From Page One)

concentrated on the production of  
drought and sawfly resistant types,  
and also a wheat with a length of  
straw which will dominate the  
Russian thistle.

W. T. G. Weiner, secretary of the  
national organization, emphasized  
the necessity of having the seed  
certification right, and told of the efforts  
of groups of scientists, technicians,  
and plant pathologists, to produce  
and maintain a pure basic stock and  
to assist in adding to the store of  
knowledge. Partly of seed may be  
maintained under proper conditions,  
he stated, and urged growers of cer-  
tified seed to give thought to control  
of disease.

**Paid High Tribute**  
Major H. G. L. Strange paid high  
tribute to the work of such quiet  
unassuming men as Dr. Humphries  
and Dr. Newman, G. E. DeLong, and  
others and asked that growers make  
known to their provincial and federal  
representatives how much they  
valued the services given by such  
men.

Other speakers were O. S. Long-  
man, Field Crops Commissioner for  
Alberta, Dr. J. R. Fryers, of the  
University of Alberta, and retiring  
secretary of the Alberta Branch of  
the Association, F. H. Reed, supt.  
of the Experimental Farm, Car-  
leton Place, Ontario, and Dr. J. R.  
B. F. Forward, Chief Analyst, Dom-  
inion Seed Branch, Calgary.

At the morning session reports  
were heard from H. G. Young and  
G. E. DeLong, who were Alberta  
Directors on the National Board,  
and who attended the annual meet-  
ing in Saskatoon. An interesting  
report of the organization's activities  
during the past year was also given  
by the secretary.

One of the main features of the  
field day was the discussion of the  
work of the crop testing plan, and  
an outline of the results of the an-  
alysis of 397 farmers' samples of  
wheat growing on the station farm.  
These samples were collected last  
fall from over 20 stations near La-  
combe, from farmers' wagons or  
trucks by elevator agents of the  
company associated in the crop test-  
ing plan. They were sent to La-  
combe and grown for test as to the  
variety the farmers were growing,  
and how true to variety they were.

**Samples Are Analyzed**  
Each individual sample was an-  
alyzed by G. E. DeLong, assistant  
superintendent at the station, and  
given a classification as to "A," "B,"  
or "C." "A" samples are those  
which are true to variety; it is  
suitable to the district and the grain  
is very satisfactory to be used for  
seed. "B" are those which contain  
a small percentage of mixtures,  
which are badly mixed grain or the  
variety is unsuited to the district.

Elevator agents who collected the  
samples will be given the results,  
and will then assist farmers whose  
samples tested "B" or "C" to ex-  
change a quantity of their grain for  
a supply of seed from farmers grow-  
ing "A" grain.

Out of the 397 samples tested here  
26.4 per cent classed "A"; 18.2 per  
cent "B" and 55.4 per cent "C"; 80.5  
per cent of the samples were of mix-  
tures, 30.2 per cent Garnet, 12.8 per  
cent Red Bobs, 4.0 per cent Reward  
and the balance miscellaneous varie-  
ties or mixtures.

**Over 100 Plots On Test**  
The crop testing plan has been  
operating for six years and this year  
over 100 testing plots are on test  
in the three prairie provinces this  
summer, when over 20,000 farmers'  
fields will be tested. The plan is  
sponsored by seven large line ele-  
vator companies, including the Al-  
berta Pacific, Searle, Midland and  
Pacific, National, Home, British Am-  
erica, and Northern companies. The  
director of the plan is Major H. G.  
L. Strange of Winnipeg, who will be  
remembered as a prominent seed  
grower of Fenn, Alta.

In the six years this work has  
been going on, elevator agents of  
these companies have exchanged for  
farmers 4,000,000 bushels of "A"  
seed, and in addition 150,000 bush-  
els of registered seed have been dis-  
tributed by these companies to farm-  
ers at cost. The work is endorsed  
and assistance given by such insti-  
tutions as the Dominion Experimental  
Farms, Dominion Seed Branch,  
provincial universities and Depart-  
ments of Agriculture of the prairie  
provinces and the Schools of Agri-  
culture in Alberta.

This year the work is being  
adopted in two States of the United  
States and in Australia.

## Blackfalds

**BLACKFALDS**—Mrs. Matthea left  
last week to visit her daughter at  
Coronation.

Barbara Jean Crocker returned  
on Sunday from a two-week visit at  
Clive. She expected to leave on  
Tuesday for the Rotary camp at  
Sylvan Lake.

Jackie Westlake of Calgary, who  
has been visiting his aunt, Mrs. Rile,  
left for his home on Saturday.

Mrs. Bonnie Gwyn and family  
were visitors to Rimby last week.  
Mr. and Mrs. Lorne Bell visited  
with Mrs. Bell's parents at Leslieville  
during the past week-end.

The Misses Mabel and Gertrude  
Martin and Nettie Rowe have return-  
ed from summer school in Edmonton.  
Henrietta Miller and Faye Fellock  
have returned from summer school  
in Calgary.

Mr. Nels Hedemark is here on a  
two week visit enroute from Seattle  
to Alaska. The Hedemark family  
held a reunion picnic at Sylvan Lake  
on Sunday last.

Mrs. Walker has with her at pre-  
sent, her sister and family from  
Calgary.

Mrs. Cadman and Edith are in  
Calgary visiting friends.

Mr. Hardwick and Boyd are in  
Airdrie where Mr. Hardwick is look-  
ing after a fox ranch. Mrs. Hardwick  
and Joyce are expected to follow  
later.

## Chigwell

**CHIGWELL**—W. Cochlin is busy  
these days building a back porch on  
his house.

Mrs. Blair from Lacombe is visit-  
ing her daughter, Mrs. Hudkins for  
a few days.

Mr. Fife has started harvesting.  
It looks as though harvesting will  
be quite general through the neigh-  
borhood in a few days.

Several families from this district  
spent Sunday at Sylvan Lake.

Mr. Beiler and sons have spent a  
very busy summer at brush cutting.  
Arthur and Floyd Wilson spent  
Monday and Tuesday in Calgary.

George Graham and family have  
moved back to this district from  
Idaho.

## Remains of Roman Bath Is Third Find In Sussex

**LITTLEHAMPTON, Eng.**—Dis-  
covery of a large Roman bath at  
Angmering in Sussex is the third  
find of the Roman occupation which  
has been made recently in this dis-  
trict.

The excavations now being  
carried on by the Littlehampton Ar-  
chaeological Society have uncovered  
two sets of rooms complete with  
their hypocaust-lined plunge bath. The  
large central system could also be  
emptied by a large stone drain with  
a tiled flooring.

Objects found during the excavation  
indicate that the bath was in use  
from about the end of the first cen-  
tury A.D. for about 50 years before  
it was abandoned. Experts think  
that there must have been a large  
villa to which this bath belonged,  
and they hope to discover this as  
well.

## OIL INDUSTRY IS BIG CONTRIBUTOR TO SAFETY

However, alarming our national  
highway accident rate may be, and  
however much it may call for de-  
cisive action, if the story of safety  
achievements could be adequately  
written, the oil industry would rank  
high in the list of contributions.

In the face of public demands the  
automobile owners have been pow-  
erless to hold back advances in de-  
sign, and let it be said to their  
credit that they have matched every  
increase in power with a correspond-  
ing increase in safety. Models of  
today with all their speed are ac-  
tually safer than those of a few  
years ago.

But it is not enough that a motor  
vehicle be built safe. It must also  
be maintained in safe condition, and  
no one realizes this better than the  
manufacturer.

The oil refiner and compounder,  
for instance, contribute to safety by  
providing vast sums each year in  
developing specialized fuels and  
lubricants embodying the extra de-  
gree of protection that means an  
extra measure of safety.

The oil marketing companies con-  
tribute to safety by providing safe  
lubricants and equipment for an  
economical and universally available  
lubrication service. With a full  
sense of their responsibility, they  
have invested millions in efficient  
facilities—and "millions more in  
educating their men to rigid stan-  
dards of service.

## 77 Boys to Explore Newfoundland Coast

LONDON, Eng.—An expedition of  
77 boys from England will explore  
and survey the little known coun-  
try on the west coast of Newfound-  
land.

The party is to be in charge of  
Surgeon-Commander Murray Lev-  
ick, who is to have with him seven

assistant leaders. The party is tak-  
ing eight radio receivers to keep in  
touch with the world. There is also  
to be a naval telegrapher with two  
transmitters. With these it is hoped  
to keep in touch with the admiralty  
in London.

The boys come mainly from 28  
public schools. Eight are from  
county schools. The expedition is  
the largest in numbers which has  
ever gone from Great Britain.

## Rimbeys

**RIMBEY**—Mr. and Mrs. A. B. MacDonald and their children, Jack and Shirley, have left for a three week's motor trip to Portland, Oregon.

Miss Marion Halpin of Calgary arrived in Rimbeys on Sunday and will remain during August, the guest of her brother, Dr. H. E. Halpin and Mrs. Halpin.

Alex White of the Rimbeys dairy store is spending a month at Oxbow, Sask.

Dr. J. C. Byers and Mrs. Byers returned on Monday from a motor trip which extended as far south as Salt Lake City and through the Pacific Coast states and provinces.

Mrs. M. Donnelly of Beekin, Ontario, is the guest of her son Frank Donnelly and Mrs. Donnelly at Rimbeys. Mrs. Donnelly plans to return home about the middle of August.

Mrs. S. J. Byers of Ponoka has been visiting with her son, Dr. J. N. C. Byers and Mrs. Byers.

An induction service was conducted in the United Church at Bluffton in honor of Rev. W. A. Huston, Rev. C. A. Warren of Bentley was in charge of the service, assisted by Rev. A. Ferrie of Morningside.

**Cutting Starts**  
Wheat harvest started here in August 4. Helmer Riley, 9 miles east of Rimbeys, has 100 acres of wheat cut and stacked. Jerome Donnelly, north of Rimbeys, and L. Uhl, Russell McClain and C. A. Rimbeys, west of town, are cutting wheat. Cutting will be general the middle of the week.

Miss Bernice Miles of Brooks, is a guest at the home of her sister, Mrs. Harry Palm, and her grandmother, Mrs. T. G. Wilton.

**SOCIAL GROUP**  
A continental writer has been commenting on the importance that is attached to dining in England.

It was Douglas Jerrold who once said, "If an earth quake were to engulf England tomorrow, the English would manage to meet and dine somewhere among the rubbish, just to celebrate the event."

## The World of Wheat

By H. G. L. STRANGE  
Director, "Crop Testing Plan"

For the first time in four years the world will produce, this year, in spite of Canada's poor crop, as much wheat as it will consume—about 5,000 million bushels.

From 1928, however, the world consumed each year less than it produced, and so the world surplus, which usually is 600 million bushels, grew each year until, by 1934, it amounted to 1,149 million bushels.

Since 1934, each year, however, the world has consumed actually more wheat than it has produced, and so the difference was taken out of the surplus until today the 1,149 million bushels of carry-over has been reduced, not only to 600 million, which is the normal, but down to 450 million. This year, however, the world's crop will be some 200 million bushels more than it was last year, or just about sufficient to meet the world's needs.

The lesson to be learned here, it seems, is to regard wheat always as an international commodity, grown and consumed in large quantities in almost every country in the world, and to remember that deficiencies in any one year in any one country, can easily be made up by equivalent surpluses grown in another country, all having its ultimate effect upon the price.

Following factors have tended to raise the price: Germany prohibits use of bread grains as feed—Polish and German rye crops expected to be ten per cent under last year's—reports that Canada buying U.S. wheat—U.S. private wheat estimates reduced from 871 million to 841 million bushels—Roosevelt announces surplus crop control essential.

Following factors have tended to lower prices:—European demand remains poor—U.S. offering wheat—expect greatest Japanese wheat crop in history—China fixes maximum futures prices for wheat and flour—Manchurian soybean crop above last year—apple production increasing in Japan—Mediterranean fig prospects favorable.

## Social Credit

By CAMERON FRASER

Social Credit, Social Credit. Have you heard this sound before? Have you heard it o'er the ether. With its sullen, baneful roar?

Have you heard it from a pulpit Desecrated by its name, While those gathered near to worship Bow their heads and flush with shame?

Have you heard the truth perverted And the Gospel made a jest? Have you seen the PUNCH and Judy show That profanes our day of rest?

Have you heard of schemes fantastic And of promise strange and vain? Have you heard the voice bombastic And of late its mournful strain?

Have you wondered at the using Of a seeming piety And of confidence abusing All for notoriety?

Have you wondered at the people Who can tolerate such stuff? Wonder, too, at those persisting In the peddling of such guff?

Have you ever paused and pondered On the jolly mess we're in? Did you think you had a grievance When the whole world chose to grin?

Has your very soul revolted And the tawdry, cheap parade Of our legislative circus On its careless, down-hill grade?

Have you seen a province groaning Underneath a load of debt While a bunch of very school kids Make the burden greater yet?

Have you stood and gazed admiring At those stately, massive walls And in fancy watched a Cromwell Clear those legislative halls?

Where are they now, that chose to be Fooled by promises to grand? Do they seek another Moses And a fairer promised land?

Have they, too, got tired of waiting On this hopeless, helpless crew? Will they have another brain storm Like the C.C.F., think you?

Ask the men who love Alberta And its one-time honored name, Ask the men who want Alberta Glorious, on the scroll of fame.

Ask the men who, once confiding In a promised dividend, What they'll do in every riding Soon, this hopeless mess to end.

Experience is a costly teacher, We've had ours, you can't deny, Here's another timely maxim—Bitten once, you'll be twice shy.

Then let us all unite once more, Though the struggle hard may seem, With courage, faith and sanity Our fair promise to redeem.

**Boom for Romance Seen in Ring Sales**

BIRMINGHAM, Eng.—That England is having a boom in romance might be inferred from the fact that a firm here which began in 1934 making boxes for engagement rings and stock-pads for displaying them has since then increased its workshop sixfold.

This firm manufactured in one year 2,500,000 velvet display pads and 3,000,000 boxes; it buys velvet 100,000 yards at a time.

**The Long Trail**  
He was baffled at every turn, but he went on and on. He knew that if only he could keep going long enough he would finally reach the sea. He lost all count of time. All he could think of was that moment when he would leave this bewildering expanse and feel the salt tang in his nostrils; it was a moment worth striving for, and his step quickened. Now his way led uphill, but his stride remained firm; he felt that any minute now his wanderings would end, his quest prove successful.

And, sure enough, soon afterwards he staggered triumphantly from the maze of corridors, shops, pleasure-halls, and palm-lounges on to the luxury liner's promenade-deck.

**CHEAP TIME**  
"Young man," said the city merchant, "I notice that you are almost invariably from 10 to 20 minutes late in getting to the office."

"I know, sir," replied the youth, "but you seem to set such a small value on my time that I didn't think it mattered much."

**MATTER OF OVERHEAD**  
The barefoot young man stood before the grizzled mountaineer. "Mistah Burbridge," he stammered, "I've come here to ask yer fer yer daughter's hand."

"Cain't allow no such thing," drawled the mountaineer. "Yer takes the whole gal, or nothin'!"
